Unit rates from your rain gauge

4 problems · 1 page

Name _____ Date _____

A unit rate answers one question: how much for one? Divide the total by the count, and always write the unit.

Period	Rain	Days	Rate
Mon–Wed	12 mm	3 days	
Thu–Sat		3 days	5 mm per day
Last week	28 mm	7 days	
Long rains, one week	63 mm		9 mm per day

1. Fill in the four gaps in the table.

2. Which period was wettest per day? How do you know?

3. Kericho gets 6 mm a day in the long rains. How much in 2 weeks?

4. Read your own gauge for 3 days. Work out your rate and compare it with a friend's.
