Lesson plan

For your parent or guide · 1 page

Goal

Use ratio tables and double number lines to plan a real order, and choose the better tool for each problem.

Before the premiere

- Do the two-minute warm-up.
- Have a pencil and the double number line template ready.

After

- Plan Grace’s 300-roll order on both tools.
- Ask: when is a table quicker? When is a line clearer?
