Math · L6 · Activity

Pace your street before the session

Activity · 20 min

Name _____ Date _____

What you need

- A friend or family member
- A notebook
- A tape measure if you have one

Steps

1. Measure 10 of your normal steps with a tape, or count steps along a 10 m line.
2. Work out one pace in metres.
3. Walk the length of your street twice, counting steps.
4. Turn steps into metres.
5. Bring both numbers on Friday.

Walk	Steps	Metres
Pace 1		
Pace 2		
Average		

Mr. Odhiambo says: “A surveyor never trusts one measurement.” If your two walks differ a lot, walk a third time.
