Answer key with drawings

For your parent or guide · 1 page

Same amount, different name

Fraction	Equivalent	Why
2/3	4/6	×2 top and bottom
2/3	6/9	×3
2/3	8/12	×4
2/3 vs 4/9	Not equal	Top ×2, bottom ×3: 4/9 is smaller

Common mistake: judging by the digits (“4/6 has bigger numbers so it’s bigger”). Ask the learner to shade both on the same strip.
